

FTP Quick Settings

Enter the following settings into your FTP program to initiate a connection to the YCCD Web Hosting Server. Please be aware that only FTP clients that support the newer FTPES protocol will connect successfully.

All users must agree to the YCCD Web Hosting Service Guidelines before connecting. Only YCCD employees with valid network credentials may use the FTP service.

Host: sites.yosemite.edu

Port: 21

Server Type: FTPES – FTP over explicit TLS/SSL

Logon Type: Normal (Not Anonymous)

Transfer Mode: Passive

Username and password: Standard YCCD username and password.

After connecting, simply browse to the folder matching your websites URL.
